

Supply Chain Savings You Can Count On!

Western
Healthcare
Alliance

We know that an effective relationship with a GPO is critical to your **bottom line**. WHA has partnered with Premier and Adventist since 2011 to provide access to market leading pricing, advantageous wholesaler agreements and a wide range of services designed to support Materials Managers and supply chain operations.

Through this partnership, members can reduce supply expenses, improve operations, and create more collaboration amongst their leaders. In 2015 alone, WHA members saved over \$1.3 million by utilizing the WHA GPO program. This program continues to help members maximize their supply chain process while at the same time improving quality and reducing costs.

Contact **RoxAnne Neal** at 916.774.7361 or roxanne.neal@ah.org to see how the WHA GPO can save your facility money today!

Non-Acute Supply Chain Savings

For members needing access to a non-acute portfolio, the WHA GPO program further partners with Premier, Adventist Health and Henry Schein Medical to provide contract access to medical/surgical supplies, pharmaceuticals, laboratory supplies, and equipment for non-acute facilities.

From employee cellular phone discounts and office supplies to medical supplies and food services, our non-acute portfolio can help members balance their supply costs through pricing connectivity and integrity. With no cost to participate combined with an aggressive acute-care pricing strategy, WHA members can save 10 – 25% on supplies.

Contact **Paul Blanchard** at 916.746.5919 or planchp@ah.org for additional details on non-acute supplies.

For additional details on these programs, please visit us online at www.wha1.org/supply-chain.
