

DON'T HAVE THE BUDGET OR STAFF FOR AN IN-HOUSE SIEM? WE CAN HELP!

Safeguarding patient health information and protecting hospital infrastructure is a huge burden for our rural members to manage. And, don't forget the compliance component. Through a new relationship with EPC USA and Arctic Wolf, WHA members no longer need to carry this burden alone.

Arctic Wolf Managed Detection and Response™

Fiercest SOC-as-a-Service

A security operations center (SOC) is the most essential element of modern security. But SOC's are expensive, complicated, and far beyond the reach of most small to midsize enterprises. Many take the easy route and invest in products, though investment in new security products is no guarantee of security.

Arctic Wolf differs from traditional managed security services. It is a dynamic combination of world-class Concierge Security Team (CST), advanced machine learning, and comprehensive, up-to-the-minute threat intelligence. Your CST conducts both routine and non-routine tasks to protect you from known and emerging threats.

Concierge Security Team™

- Customer-dedicated primary contact
- Actionable remediation recommendations

Advanced Threat Detection

- Machine learning with adaptive tuning for efficiency and scale
- Proactive hunting and remote forensic analysis

Security Incident and Crisis Support

- Prioritize security incidents with actionable intelligence
- Required steps for response and remediation

Log Search

- Simple interface, sample search templates
- Facilitates rapid searching of operational logs
- Available to MSP Plus and resellers
- Comprehensive log collection and retention
- No query languages to learn

Cloud Monitoring

- 360-degree visibility across customer's on-premises and cloud resources
 - Public cloud infrastructure
 - SaaS applications
 - Security services

Compliance

- Log management and compliance reporting
- Reduces time and costs of audit preparation
- Simple, predictable pricing
- Fixed recurring price
- Unlimited data collection

Arctic Wolf Managed Risk™ Services

Continuous Vulnerability Scanning and Endpoint Analytics Managed by Security Experts

Arctic Wolf's risk assessment services enables you to continuously scan your networks and endpoints, and quantify risk-based vulnerabilities. Unlike alternatives that rely on automated approaches that make assessing vulnerabilities difficult, Arctic Wolf's Concierge Security Team™ provides a quantified, real-time understanding of your cyber risks so you can take prioritized action to improve your cyber risk posture.

Comprehensive Visibility into Your Risk Posture

Continuous Risk Assessment. Continuously scans assets to avoid risky delays in security awareness Internal Vulnerability Assessment. Identifies exploitable vulnerabilities in systems inside the corporate network

External Vulnerability Assessment. Discovers exploitable vulnerabilities in internet-facing systems on the corporate network

Host-Based Vulnerability Assessment. Monitors hardware, software, and registry configurations and changes to reveal risks only detectable by on-device observations

Dynamic Asset Identification. Profiles and classifies assets on your network to build a comprehensive inventory

Comprehensive Risk Profiling. Aggregates and quantifies risk indicators from external and internal networks, as well as licensed endpoints.

Customer Portal - Management and Analytics

Arctic Wolf's easy-to-use customer portal is tailored to each organization's priorities and is easy to manage with customized reports and analytics to help you reduce your cyber risk exposure.
