

Cyber SIEM Solutions

**World-class IT &
Security Solutions**

WHA partners with EPC USA to bring cutting edge IT and security solutions to members. Offering cyber SIEM solutions and managed security awareness, EPC is your go-to to protect your organization from outside threats!

ARCTIC WOLF

Cyber SIEM Solutions

Arctic Wolf offers a powerful layer of protection to your cybersecurity strategy with the [Arctic Wolf Security Operations Warranty](#). This industry-leading warranty offers up to \$3 million coverage for qualifying customers in the event of a covered cybersecurity incident.

Managed Detection & Response

Arctic Wolf® Managed Detection and Response (MDR) provides 24x7 monitoring of your networks, endpoints, and cloud environments to help you detect, respond, and recover from modern cyber attacks.

Detect

Broad Visibility

Works with your existing technology stack to discover and profile assets and collect data and security event observations from multiple sources.

24x7 Monitoring

Your environment is monitored for threats and risks around the clock, allowing you to focus on other important areas of your business.

Advanced Threats

Catch advanced threats that are missed with other approaches with a platform that analyzes more security data, and an experienced team who knows how to look for them.

Respond

Managed Investigations

We investigate suspicious activity so you don't have to, making alert fatigue and time wasted on investigating false positives a thing of the past.

Incident Response

Every second counts. Detect and respond to critical security incidents within minutes to prevent the spread of threats.

Log Retention and Search

Takes the work out of managing logs, enabling you to easily conduct additional investigations, if needed.

Recover

Guided Remediation

We work with you on detection, response, and remediation to validate the threat has been neutralized and verifying it hasn't returned.

Root Cause Analysis

Deep investigation into the root cause of incidents to promote the creation of customized rules and workflows that harden your posture.

Personalized Engagement

Regular meetings to review your overall security posture and find areas of improvement that are optimized for your environment.

Managed Risk

Arctic Wolf Managed Risk enables you to discover, assess, and harden your environment against digital risks by contextualizing your attack surface coverage across your networks, endpoints, and cloud environments.

Managed prioritization and personalized protection is delivered by your Concierge Security Team[®]. The Concierge Security Team is a force multiplier to your existing security team. If you don't have a security team, you gain instant access to security professionals that are otherwise difficult, if not impossible to find. Your named Concierge Security Engineer works with you to prioritize vulnerabilities discovered from networks, endpoints, and cloud environments.

"Arctic Wolf went to work the week after we signed the agreement. In just a couple of weeks, they've already identified quite a few 'opportunities' for us to bolster our environment. We are already sleeping better knowing that they are our partner."

-Jennifer Riley, CEO
Memorial Regional Health

24x7 Continuous Monitoring

Around-the-clock monitoring for vulnerabilities, system misconfigurations, and account takeover exposure across your endpoints, networks, and cloud environments.

Strategic Recommendations

Your named Concierge Security engineer becomes your trusted security advisor, working with you to make recommendations that harden your security posture over time.

Personalized Engagement

Regular meetings with your named Concierge Security engineer to review your overall security posture and find areas of improvement that are optimized for your environment.

- ▶ **Discover** – They start with the essential task of identifying assets in your environment and defining your attack surface across network, perimeter, host and accounts.
- ▶ **Assess** – The Concierge Security Team then contextualizes your attack surface coverage with risk policies, asset criticalities, and SLOs (service level objectives). This contextualization enables you to prepare your environment to end cyber risk. Then the Concierge Security Team assesses and provides you with the risk priorities in your environment.
- ▶ **Harden** – Finally they advise you on remediation actions to ensure you are benchmarking against configuration best practices and continually hardening your security posture.

Managed Security Awareness

Arctic Wolf Managed Security Awareness prepares your employees to recognize and neutralize social engineering attacks and human error—helping to end cyber risk at your organization.

Engage

Train and prepare employees to stop social engineering attacks, like phishing.

Measure

Identify employees that fall behind and determine which threat topics require reinforcement.

Transform

Achieve a culture of security and strengthen cyber resilience.

Managed Security Awareness Training Addresses the Most Common Cyberthreats by Influencing Behavior and Fostering a Security Culture

▶ Improve Protection

Prepare employees to recognize and neutralize social engineering attacks, like phishing.

▶ Strengthen Resilience

Empower employees to identify cyber risks and report mistakes that could expose sensitive data.

▶ Achieve Compliance

Deliver security awareness training for regulatory compliance.
