

Cybersecurity Solutions

**World-class IT &
Security Solutions**

Safeguarding patient health information and protecting infrastructure is a huge burden for our rural members to manage. And don't forget the compliance component. Through a relationship with EPC USA and Arctic Wolf, WHA members don't need to carry this burden alone.

Arctic Wolf offers a powerful layer of protection to your cybersecurity strategy with the Arctic Wolf Security Operations Warranty. This industry-leading warranty offers up to \$3 million coverage for qualifying customers in the event of a covered cybersecurity incident.

Managed Detection & Response

Arctic Wolf® Managed Detection and Response (MDR) provides 24x7 monitoring of your networks, endpoints, and cloud environments to help you detect, respond, and recover from modern cyber attacks.

Detect

Get full visibility across all attack surfaces with integrated telemetry for investigation and guided 24x7 threat detection.

Respond

Contain threats before damage occurs through Agentic SOC response with humans in the loop to reduce risk.

Remediate

Turn every incident into an opportunity to strengthen your security posture with the Concierge Experience. Go beyond clean-up with guided improvements to stay ahead of threats.

Managed Risk

Reduce Risk, Increase Resilience

- ▶ **The Challenge** – Organizations struggle to see and manage security risk. Basic questions—what assets exist, which have vulnerabilities, which are misconfigured—are often hard to answer. And when data is available, overwhelmed teams drown in alerts lacking context, letting risks pile up and exposing the business to breaches.
- ▶ **The Solution** – Arctic Wolf Managed Risk, built on the industry's only cloud-native security operations platform, gives you full visibility into your attack surface across network, endpoint, and cloud. We prioritize your risks and guide remediation, so you can benchmark against best practices and continuously strengthen your security posture.

Concierge Security Team

24x7 Continuous Monitoring

Unified Visibility

Strategic Recommendations

Personalized Engagement

Discover

The ability to discover and gain visibility into your current attack surface.

Prioritize

Determine your cyber risk in the context of your business.

Harden

Expertise to guide your strategy and help you harden your environment.

Managed Security Awareness

Arctic Wolf Managed Security Awareness prepares your employees to recognize and neutralize social engineering attacks and human error, helping to end cyber risk at your organization.

Engage

Train and prepare employees to stop social engineering attacks, like phishing.

Measure

Identify employees that fall behind and determine which threat topics require reinforcement.

Transform

Achieve a culture of security and strengthen cyber resilience.

Managed security awareness training addresses the most common cyberthreats by influencing behavior and fostering a security culture.

Improve Protection

Prepare employees to recognize and neutralize social engineering attacks, like phishing.

Strengthen Resilience

Empower employees to identify cyber risks and report mistakes that could expose sensitive data.

Achieve Compliance

Deliver security awareness training for regulatory compliance.

Effective cybersecurity brings together people, processes, and technology to protect the confidentiality, integrity, and availability of the information assets that keep your business running and serving its customers. Through RM Cyber's partnership with WHA, members have access to expert threat prevention and mitigation support.

Advisory Services

In today's fast-moving threat landscape, strong cybersecurity is a business differentiator, not just a defensive necessity. RM Cyber's Cybersecurity Advisory services provide strategic guidance to help you navigate complexity, anticipate emerging threats, and turn security investments into competitive advantage, wherever your organization stands today.

- Risk Assessments
- Roadmaps
- vCISO
- Policy Development
- Cloud & TPRM Governance
- Incident Response Plans

Threat Management

Enhance your organization's security infrastructure with cybersecurity assessments and penetration testing designed to protect your assets and ensure peace of mind.

- Penetration Testing
- Application Assessments
- Cloud Security Assessments
- Physical Security Assessments
- Social Engineering
- Incident Response Tabletop

Managed Security Services

RM Cyber lets organizations hand off their entire cybersecurity function to our specialized team. They design your program architecture and manage execution, from technical assessments to incident response to executive communications, all tailored to your operations, maturity level, and growth needs.

- Managed Cybersecurity Team
- Fully Outsourced Cybersecurity Services
- Professional Services for Cybersecurity Platforms & Products
- Strategy & Technology Advising for Cybersecurity Programs

Reach out today to see how EPC USA can help you improve your security posture at a reasonable cost.
